BEAN & BEN

BRAND + WEBSITE

DEVELOPER HANDOFF GUIDE

Visual identity, content direction, website specifications and production standards in one source of truth.

BEAN & BEN COFFEE

VERSION 1.1 / 22 JULY 2026

SILANG, CAVITE

00 / DOCUMENT CONTROL

The single source of truth for brand, design, content, and web implementation decisions.

Build a website that feels like entering one rooftop destination for coffee, focus, connection, and play - designed for breaks and breakthroughs.

PURPOSE

This document gives the web designer and developer a complete working brief. It combines the supplied brand direction, visual references, current menu assets, the expanded coffee shop + coworking + gaming lounge concept, preferred website sections, and coding standards into one implementation-ready guide.

ITEM	DECISION
Project	Bean & Ben coffee shop + coworking + gaming lounge website
Primary objective	Create a modern, premium, bold website that clearly presents the coffee shop, coworking space, gaming lounge, menu, and location.
Primary hero tagline	FOR YOUR BREAKS & BREAKTHROUGHS
Central creative idea	COFFEE. COWORK. PLAY.
Core visual style	Warm industrial minimalism / modern industrial luxury
Technical direction	Responsive WordPress build using semantic HTML, clean CSS, and plain JavaScript unless otherwise approved.
Document status	Version 1.1 - updated direction for developer quotation, design, and build.
Approved Facebook	https://www.facebook.com/profile.php?id=61573491156329

NON-NEGOTIABLES

- The website must remain predominantly black, warm white, chrome/steel, cement gray, and light oak.
- Food and drink photography—not decorative effects—must provide most of the color.
- The hero must use the exact headline “FOR YOUR BREAKS & BREAKTHROUGHS.”
- The site must feel warm and welcoming despite its dark industrial palette.
- Coffee shop, coworking, gaming lounge, menu, location, hours, and directions must be obvious and easy to reach on mobile.
- Do not use generic coffee, coworking, or gaming templates; bright fast-food colors; excessive gold; loud gamer clichés; or fake luxury language.

IMPORTANT CONTENT STATUS

Founder details, approved testimonials, phone/email, final coworking amenities and rates, final gaming equipment and rates, and current menu prices were not fully supplied as structured content. The Facebook profile is approved. All remaining details must be treated as client inputs - not invented.

01 / CONTENTS

Use the numbered sections below as the build and review checklist.

SECTION	WHAT IT COVERS	DEVELOPER USE
02	Brand Foundation	Purpose, positioning, audience, essence, promise
03	Voice & Messaging	Personality, tone, language, taglines, sample copy
04	Visual Identity	Creative direction, palette, typography, logo, photography
05	Website Strategy	Goals, information architecture, journeys, success criteria
06	Homepage Specifications	Navigation, hero, menu, about, founder, reviews, location, footer
07	Interface Design System	Layout, spacing, components, buttons, cards, forms
08	Responsive & Motion	Breakpoints, mobile behavior, interaction and animation rules
09	Content & CMS Model	Editable fields, menu data, founder, reviews, site options
10	WordPress & Code Standards	Architecture, naming, security, code quality
11	Accessibility, Performance & SEO	Launch quality and discoverability standards
12	Delivery & Acceptance	Required assets, QA, handoff, launch checklist
13	Reference Assets	Supplied logo, identity board, and menu sheets

HOW TO USE THIS GUIDE

1. Developer confirms the technical scope and flags any implementation conflicts before coding.
2. Designer creates the homepage and mobile key screens using Sections 04–08.
3. Client supplies the missing content listed in Section 12.
4. Developer builds editable content according to Section 09—not as hard-coded text or prices.
5. Final review uses the acceptance checklist in Section 12.

DECISION HIERARCHY

When references conflict, follow this order: (1) this handoff document, (2) approved logo files and current brand board, (3) supplied menu sheets, (4) general reference images. References are inspiration, not templates to copy.

02 / BRAND FOUNDATION

What Bean & Ben is, who it serves, and how coffee, focused work, and social play should feel as one connected experience.

BRAND OVERVIEW

Bean & Ben is a bold rooftop destination that combines a coffee shop, coworking space, and gaming lounge in one warm industrial environment. It is built for breaks, focused work, creative progress, casual play, and late-night

conversations. Rooted in Silang, Cavite, the brand should feel proudly local, useful, social, and premium without becoming formal or cold.

A warm rooftop space for coffee breaks, focused work, shared wins, and the breakthroughs in between.

Core brand idea

COFFEE SHOP

Bold coffee, non-coffee drinks, and satisfying food give guests a reason to drop in, recharge, and stay.

COWORKING SPACE

A focus-friendly place for students, freelancers, remote workers, creators, and small teams to study, meet, and build.

GAMING LOUNGE

A social play space for friends and gamers to unwind, connect, compete, and celebrate.

ONE FLEXIBLE DESTINATION

Guests can move naturally between break mode, work mode, and game mode without leaving the venue.

Positioning statement

For students, professionals, creators, gamers, barkadas, and coffee lovers in Silang and nearby areas, Bean & Ben is a warm industrial rooftop destination that combines a coffee shop, coworking space, and gaming lounge - giving guests one place to recharge, focus, connect, and play.

Brand essence and promise

ELEMENT	APPROVED DIRECTION
Essence	Good coffee. Deep focus. Better play.
Promise	Every visit should support the mode the guest needs - a break, a productive session, a shared game, or the breakthrough that comes next.
Three words	Bold. Warm. Versatile.
One-sentence summary	A warm industrial rooftop coffee shop, coworking space, and gaming lounge for breaks, focused work, social play, and late-night connection.

02A / AUDIENCE & DIFFERENTIATION

The website should sell a flexible destination and a clear use case - not only a beverage list.

Primary audience groups

REMOTE WORKERS & FREELANCERS

Guests who need a comfortable place to focus, take calls where permitted, meet, and finish meaningful work.

GAMERS & BARKADAS

Friends who want a social gaming experience supported by drinks, food, and a comfortable place to stay.

COFFEE & FOOD GUESTS

Customers visiting for espresso, matcha, non-coffee drinks, breakfast, croffles, pasta, pizza, and quick breaks.

STUDENTS & STUDY GROUPS

People looking for a warm, accessible place for individual study, group work, and project sessions.

CREATORS & SMALL TEAMS

Designers, marketers, entrepreneurs, and collaborators who need an informal space to plan, build, and exchange ideas.

NIGHT OWLS & CASUAL VISITORS

Guests looking for a late-night rooftop atmosphere, relaxed conversations, and flexible ways to spend time.

Competitive advantages to communicate

- Coffee shop, coworking space, and gaming lounge in one destination.
- Rooftop setting and late-night atmosphere that support breaks, focus, connection, and play.
- Broad menu that supports quick visits, full meals, long sessions, and group orders.
- Clear visual and spatial cues for coffee, coworking, socializing, and gaming.
- Strong industrial identity with a conversational Filipino personality.
- Premium presentation without stiffness, exclusivity, or unnecessary formality.

Customer experience priorities

CUSTOMER QUESTION	WEBSITE ANSWER
What is this place?	A rooftop coffee shop, coworking space, and gaming lounge in Silang.
Can I work or study here?	Show verified coworking amenities, rates, access rules, capacity, hours, and walk-in/reservation process.
Can I game here?	Show verified station or platform details, rates, rules, hours, and walk-in/reservation process.
What can I order?	Show menu categories immediately and provide a fast route to the full menu.
Where is it?	Display address, landmark guidance, map, and “Get Directions” CTA clearly.
When is it open?	Show verified venue hours, last-call information, and any service-specific schedules.
What does it feel like?	Use warm night photography showing coffee, focused work, social gaming, people, and industrial materials.
Is it worth visiting?	Feature signature products, real facilities, genuine customer proof, and the distinct rooftop experience.

CURRENT SUPPLIED BUSINESS DETAILS - VERIFY BEFORE LAUNCH

Rooftop of 888 Martinez Building, Brgy. Anahaw I, Silang, Cavite. Supplied hours: daily, 6:00 PM-2:00 AM; last call 1:30 AM. Address and hours must be confirmed immediately before publishing.
Approved Facebook: https://www.facebook.com/profile.php?id=61573491156329

03 / VOICE & MESSAGING

How the brand should sound across the website, menu, social content, announcements, and customer service.

Brand personality

CONFIDENT
Direct, assured, and visually strong. Never inflated or desperate to sound “premium.”

PLAYFUL
Uses witty Taglish, teasing, and local humor without becoming childish or noisy.

BOLD
Short headlines, dramatic product focus, memorable phrasing, decisive calls to action.

WARM
Welcoming and human. The dark palette must not create an intimidating tone.

STREET-SMART
Speaks naturally and understands local culture. It does not imitate a foreign chain.

SLIGHTLY MISCHIEVOUS
Can flirt or joke lightly, but never insults customers or jokes during complaints.

Primary voice formula

Clear information + playful line + direct invitation

CONTEXT	TONE	EXAMPLE
Website	Clean, confident, easy to scan	Coffee, focus-friendly space, and game time - all under one rooftop in Silang.
Social media	Playful, energetic, Taglish	Hindi lahat ng late-night decisions masama. Yung Spanish Latte at pizza? Approved ’yan.
Menu	Direct and appetite-focused	Espresso, milk, and caramel with a smooth, rich finish.
Announcement	Information first; humor second	We’re closing early tonight at 11 PM. Habol na bago kami maunang matulog.
Customer service	Warm, respectful, helpful	Hi! Yes, open kami tonight until 2 AM. Last call is at 1:30 AM.

CONTEXT	TONE	EXAMPLE
Complaint	Accountable; no jokes	We’re sorry your order did not meet expectations. Please send the order details so the team can make it right.

Language rules

USE	AVOID
Natural English, conversational Filipino, Taglish, short sentences, familiar local phrases.	Forced deep Filipino, stiff corporate English, fake motivational quotes.
Words such as tara, tambay, barkada, gabi, rooftop, cravings, focus, work mode, game mode, solid, warm, and breakthrough.	Overusing premium, artisanal, exquisite, curated, world-class, or “best coffee ever.”
One strong joke or line after the information is clear.	Hiding hours, prices, location, or announcements inside a long joke.
One or two intentional emojis in social captions where appropriate.	Emoji chains and all-caps captions that compete with the product.

03A / MESSAGING SYSTEM

Approved tagline hierarchy and starter copy for the coffee shop, coworking, gaming, location, and campaign experience.

LEVEL	APPROVED LINE	PRIMARY USE
Primary hero tagline	FOR YOUR BREAKS & BREAKTHROUGHS	Homepage hero, major campaigns, outdoor/signage concepts
Core experience shorthand	COFFEE. COWORK. PLAY.	Navigation, section labels, social graphics, brand summaries
Supporting location line	MEET US AT THE TOP	Location, directions, rooftop wayfinding, selected campaigns
Brand essence line	GOOD COFFEE. DEEP FOCUS. BETTER PLAY.	Section headings, social graphics, in-store/environmental applications

Supporting campaign lines

BREAK MODE

Use for coffee, food, rest, recharge, and casual visit content.

GAME MODE

Use for gaming lounge, barkada play, social competition, and game-night content.

SUNDAN ANG LIWANAG

Use for location, wayfinding, and local personality.

WORK MODE

Use for coworking, study sessions, creative work, and productive hours.

MEET US AT THE TOP

Use for rooftop location, arrival, and destination messaging.

BUILT FOR LATE NIGHTS

Use for evening hours, after-work sessions, study nights, and gaming campaigns.

Recommended homepage copy starter

SECTION	COPY
Hero eyebrow	COFFEE • COWORK • PLAY
Hero headline	FOR YOUR BREAKS & BREAKTHROUGHS
Hero subcopy	Coffee, focus-friendly space, and social gaming under one rooftop in Silang.
Primary CTA	EXPLORE THE SPACE
Secondary CTA	VIEW THE MENU
About heading	ABOVE THE USUAL
About text	Bean & Ben is a rooftop coffee shop, coworking space, and gaming lounge built for quick breaks, focused sessions, creative progress, and shared play.
Menu heading	PICK YOUR CRAVING
Location heading	SUNDAN ANG LIWANAG
Hours heading	OPEN WHILE THE NIGHT IS YOUNG
Coworking heading	WORK MODE
Coworking copy	A focus-friendly space for study, remote work, creative sessions, and small-team collaboration. Publish only verified amenities, rates, and access rules.
Gaming heading	GAME MODE
Gaming copy	A social gaming lounge for friends and players. Publish only verified platforms, station counts, rates, operating rules, and reservation details.

COPY APPROVAL NOTE

The copy above is approved as a starting point. Product descriptions, founder story, testimonials, and final business details still require client review before launch.

04 / VISUAL IDENTITY

The overall look should feel dark, architectural, warm, confident, focused, and energetic without becoming formal, cold, or visually noisy.

Creative direction: modern industrial luxury

- Deep black surfaces and controlled negative space.
- Warm white typography rather than clinical white everywhere.
- Brushed chrome, steel, and thin metallic details.
- Raw or polished cement textures.
- Light oak accents and warm ambient lighting.
- Large editorial food and drink photography.
- Condensed display typography and disciplined grids.

Premium does not mean adding gold to everything. It means restraint, quality materials, strong spacing, sharp typography, and excellent photography.

Visual formula

LAYER	PROPORTION	MEANING
Dark industrial minimalism	70%	Black surfaces, strong type, steel/chrome, architectural structure
Warm hospitality	20%	Light oak, warm lighting, food color, human moments
Playful local personality	10%	Taglish copy, unexpected lines, campaign language

Avoid

FAST-FOOD ENERGY

No bright red/yellow palette, crowded product collages, discount-starbursts, or aggressive promotional layouts.

FAKE LUXURY

No unnecessary gold, excessive gradients, ornate borders, or formal copy that sounds like a hotel brochure.

GENERIC MULTI-USE TEMPLATE

No stock coffee-bean backgrounds, fake office imagery, neon gaming clichés, script fonts, rustic kraft-paper styling, or interchangeable venue imagery.

COLD MASCULINITY

No design that feels like a motorcycle shop, nightclub, or construction supplier. Strength must stay welcoming.

04A / COLOR PALETTE

The site remains predominantly monochrome. Food, drinks, oak, and warm light provide controlled contrast.

	COLOR	PRIMARY USE	GUIDANCE
	Obsidian Black #050505	Primary backgrounds, navigation, footer, signage, packaging	65% dark system
	Carbon Black #151515	Cards, panels, dark surface variation	Within dark system
	Warm Ivory #F3F0E8	Primary text on dark, light sections, menu backgrounds	Core light
	Pure White #FFFFFF	Maximum-contrast text and logo use	Selective
	Chrome Silver #C7CBD0	Thin rules, icon outlines, borders, metallic cues	Micro-accent

	COLOR	PRIMARY USE	GUIDANCE
	Brushed Steel #777D82	Secondary text, muted UI, disabled states	Supporting
	Cement Gray #8B8983	Texture, neutral sections, environmental cues	Supporting
	Light Oak #C4A174	Warm highlights, hover accents, section details	5% or less
	Warm Ambient Light #D3A35A	Active indicators, bestseller labels, tiny highlights	2% or less

Recommended digital ratio

65% Obsidian/Carbon Black • 20% Warm Ivory/White • 8% Chrome/Steel • 5% Cement • 2% Light Oak/Warm Light

CSS color tokens

```
:root {
  --color-black: #050505;
  --color-surface: #151515;
  --color-ivory: #F3F0E8;
  --color-white: #FFFFFF;
  --color-chrome: #C7CBD0;
  --color-steel: #777D82;
  --color-cement: #8B8983;
  --color-oak: #C4A174;
  --color-warm-light: #D3A35A;
}
```

CHROME RULE

Chrome should behave like a material, not a decoration. Use it in thin borders, small labels, foil, hardware-inspired details, and controlled hover states. Never apply chrome gradients to whole backgrounds or every heading.

04B / TYPOGRAPHY

Tall display type creates the architectural identity; a clean sans serif keeps content readable and modern.

ROLE	TYPEFACE	USAGE
Logo artwork	Existing custom logo; based on Bebas Neue Cyrillic direction	Never recreate the logo by typing the name. Use approved artwork files.
Primary display	Bebas Neue Cyrillic	Hero headlines, menu categories, campaign titles, large section statements
Supporting sans serif	Manrope	Body copy, navigation, prices, buttons, forms, product descriptions
Safe fallbacks	Bebas Neue / Impact; Manrope / Arial / sans-serif	Fallback only when the preferred webfont cannot load

Website type scale

ROLE	DESKTOP	MOBILE	NOTES
Hero headline	clamp(72px, 9vw, 128px)	clamp(52px, 15vw, 72px)	Uppercase; tight line-height 0.85–0.95
Section title	48–72px	38–52px	Short phrases; strong spacing
Subsection title	30–42px	26–34px	Do not overuse all caps
Card title	20–28px	20–24px	High contrast and concise
Body copy	16–18px	16–18px	Readable line-height 1.5–1.7
Small label	11–13px	11–13px	Letter spacing 0.10–0.16em
Button	13–15px	13–15px	Semibold; uppercase optional

Type styling rules

- Display headlines: uppercase, very short, tight line spacing, no decorative outlines or shadows.
- Body text: maximum readable line length of roughly 55–70 characters.
- Navigation and micro-labels: modest tracking to create a technical, architectural feel.
- Do not set entire pages in uppercase. Use uppercase to create hierarchy, not noise.
- Do not rely on a single huge font size; balance headline scale with generous negative space.

```
.hero-title {
  font-family: "Bebas Neue", Impact, sans-serif;
  font-size: clamp(3.25rem, 9vw, 8rem);
  line-height: 0.9;
  letter-spacing: 0.01em;
  text-transform: uppercase;
}

body {
  font-family: "Manrope", Arial, sans-serif;
  font-size: 1rem;
  line-height: 1.6;
}
```

04C / LOGO SYSTEM

Use the supplied logo family consistently. Request vector master files before final production.

Supplied vertical logo lockup

Supplied monogram / brand-mark composition

Logo variants and use

VARIANT	BEST USE	MINIMUM RECOMMENDED SIZE
Full vertical lockup	Menu covers, tall signage, posters, cup sleeves, section-edge branding	Digital 120px tall / Print 30mm tall
Wordmark	Website header, wide signage, receipts, social headers	Digital 140px wide / Print 35mm wide
Bean/cherry symbol	Stickers, lids, patterns, social icons, embossing	Digital 32px / Print 10mm
BBCO monogram	Favicon, small packaging, cup stamp, loyalty card	Digital 28px / Print 8mm

Logo rules

CLEAR SPACE

Keep at least one coffee-bean element of space around every logo. No text, image, or border enters this area.

DO NOT ALTER

Never stretch, condense, rotate, add shadow/glow/outline, recolor individual letters, or rebuild the wordmark with typed text.

APPROVED COLOR

White on black, black on warm ivory, white on dark photography, black on light photography, or physical chrome/silver finishing.

IMAGE CONTRAST

On photography, add a controlled dark or light overlay when needed. The logo must remain immediately legible.

DEVELOPER ASSET REQUIREMENT

The supplied references are JPG previews. Before final launch, request transparent PNG and preferably SVG/EPS/PDF master logo files. Do not extract the production logo from a screenshot or menu sheet.

04D / PHOTOGRAPHY & GRAPHIC DIRECTION

Coffee, people, productive energy, and gaming atmosphere are the visual heroes. Lighting and materials create one connected brand world around them.

Food and drink photography

DO	AVOID
Visible condensation, steam, foam, espresso flow, sauce texture, focused expressions, clean desks, controllers, screens, and real interaction.	Artificial effects, fake productivity poses, or gaming imagery that looks staged or oversold.
Visible condensation, steam, foam, espresso flow, sauce texture, crisp edges.	Artificial effects that make food look fake or oversold.
One strong hero item with negative space for typography.	Crowding every frame with many products and floating ingredients.
Chrome, cement, black stone, smoked glass, black fabric, or light-oak surfaces.	Random props, floral styling, pastel backgrounds, or rustic farmhouse clichés.
Real serving sizes, branded cups, natural ingredients, intentional crumbs or splashes.	Low-resolution cutouts, excessive drop shadows, or misleading portion sizes.

People, coworking, gaming, and café imagery

- Capture warm lights against the night, rooftop views, coffee service, focus-friendly work areas, gaming setups, steel/cement details, and exterior landmarks.
- Use candid guests working, studying, collaborating, gaming, sharing food, or holding drinks naturally.
- Include students, freelancers, professionals, creators, gamers, barkadas, couples, and families so the brand feels inclusive.
- Avoid posed stock-photo smiles, fake esports imagery, cluttered RGB gamer clichés, and empty spaces that feel sterile.

Graphic layout system

GRID

Desktop 12 columns, tablet 8 columns, mobile 4 columns. Use deliberate asymmetry within a disciplined structure.

METAL RULES

Use 1px digital chrome or warm-white lines to divide categories, prices, and sections.

CORNER RADIUS

Buttons 2–6px, cards 0–8px, images 0–4px, large containers no more than 12px.

NEGATIVE SPACE

Do not fill every area. Large black fields and breathing room are part of the premium identity.

CROPPED TYPE

Oversized words may extend beyond the frame in hero banners or campaign graphics—selectively, not everywhere.

PRODUCT CUTOUTS

Images may overlap the grid when the composition remains controlled and elegant.

05 / WEBSITE STRATEGY

The website should convert curiosity into a visit: understand the three-in-one concept, choose a mode, explore the menu and facilities, then find the rooftop.

Primary website goals

6. Create immediate visual impact with a distinctive coffee + coworking + gaming identity.
7. Make the menu easy to scan and update without hard-coded prices.
8. Communicate the rooftop atmosphere, focus-friendly coworking offer, gaming lounge, and late-night positioning.
9. Build trust through real photography, founder presence, verified amenities and rates, reviews, and location clarity.
10. Drive three priority actions: view the menu, explore the space, and get directions.

Recommended launch architecture

PAGE / VIEW	PURPOSE	REQUIRED CONTENT
Homepage	Primary brand story and conversion page	Hero, three experience pillars, featured menu, coworking, gaming lounge, about/founder, reviews/gallery, location/contact, footer
Full menu page	Complete categorized and searchable menu	Categories, hot/iced prices, descriptions, badges, availability, images
Coworking page or anchored section	Explain the productive-space offer without ambiguity	Verified amenities, seating, capacity, rates, session rules, hours, house rules, walk-in/reservation process, real photos
Gaming lounge page or anchored section	Explain the play experience and remove booking uncertainty	Verified platforms/stations, capacity, rates, session rules, hours, house rules, walk-in/reservation process, real photos
Optional item detail/modal	Feature signature products without creating heavy navigation	Image, description, variants, price, allergens where applicable
Legal pages	Launch compliance and analytics support	Privacy policy, cookie notice if applicable, terms if ordering or reservations are added

Primary user journeys

CRAVING-LED VISIT

Hero → Featured Menu → Full Menu → Get Directions

GAME-LED VISIT

Hero → Gaming Lounge Details → Rates/Rules → Visit or Message

REPEAT CUSTOMER

Sticky navigation → Menu / Cowork / Gaming → Hours / Location

WORK-LED VISIT

Hero → Coworking Details → Rates/Rules → Visit or Message

ATMOSPHERE-LED VISIT

Hero → Experience Gallery → Reviews → Location

SOCIAL REFERRAL

Deep link or homepage → relevant experience → Facebook / map / directions

Success criteria

MEASURE	TARGET BEHAVIOR
Clarity	A first-time visitor understands “coffee shop + coworking + gaming lounge in Silang” within the first screen.
Experience access	Menu, coworking details, and gaming details are reachable quickly from the hero and sticky navigation.
Location access	Directions are reachable in one tap from the hero and location section.
Mobile usability	All major information is readable without zooming or horizontal scrolling.
Brand distinction	The site does not look like a generic café, corporate coworking template, or loud gaming landing page.
Maintainability	Menu prices, coworking/gaming details and rates, availability, hours, reviews, and images are editable in WordPress.

06 / HOMEPAGE SPECIFICATIONS

One clear scroll narrative: impact, choose your mode, craving, workspace, play, story, proof, and directions.

ORDER	SECTION	PRIMARY JOB	PRIMARY CTA
01	Navigation	Provide immediate access to menu, coworking, gaming, story, and location	Explore / Find Us
02	Hero	Establish the three-in-one concept and tagline in one screen	Explore the Space / View Menu
03	Experience Pillars	Explain Coffee, Cowork, and Play in three clear blocks	Choose Your Mode
04	Featured Menu	Show category breadth and signature items	Explore Full Menu
05	Coworking	Explain verified amenities, rates, rules, and use cases	View Coworking Details
06	Gaming Lounge	Explain verified stations/platforms, rates, rules, and use cases	View Gaming Details
07	About + Founder	Explain the concept, rooftop difference, and human story	Our Story
08	Reviews or Gallery	Provide proof across coffee, work, and play	Follow / See More
09	Location + Contact	Remove friction from the visit	Get Directions / Facebook
10	Footer	Repeat essentials, Facebook, and final links	Menu / Directions

Homepage visual rhythm

- Open dark and cinematic. Do not start with a white navigation bar or generic slideshow.
- Alternate image-led and type-led sections to avoid a repetitive card grid.
- Use warm ivory sections selectively for breathing room—especially content-heavy areas.

- Allow full-width rooftop, coworking, gaming, and interior imagery to sell the destination without turning the page into a collage.
- Finish with location clarity and a dark footer that repeats hours and directions.

CONTENT RULE

The homepage should feature only 3–6 signature items or category highlights. The full menu belongs on a dedicated view; do not force the entire menu into the homepage.

06A / NAVIGATION & HERO

The first screen must make the coffee shop + coworking + gaming lounge concept instantly clear, remain mobile-friendly, and focus on two primary actions.

Navigation specification

ELEMENT	DESKTOP	MOBILE
Position	Transparent over hero; becomes solid black on scroll	Fixed top bar; solid or translucent black
Logo	Horizontal wordmark, approximately 140–180px wide	Compact wordmark or monogram, 110–140px wide
Links	Menu, Coworking, Gaming, About, Reviews/Gallery, Location	Full-screen black drawer with large Coffee / Cowork / Play links
CTA	Explore the Space or Get Directions at far right	CTA repeated in drawer and/or fixed bottom action
Behavior	Sticky after initial hero threshold; 150–250ms transition	Accessible menu button, focus trap, close on Escape

Hero creative specification

LAYER	DIRECTION
Background	Obsidian black with a subtle cement/steel texture and warm spotlight - not a busy coffee-bean or RGB-gaming pattern.
Primary visual	One cinematic venue composition anchored by coffee, with subtle background cues of focused work and gaming. Avoid burger imagery, cluttered collages, and fake esports effects.
Copy	Eyebrow: COFFEE • COWORK • PLAY. Headline: FOR YOUR BREAKS & BREAKTHROUGHS. Supporting line: Coffee, focus-friendly space, and social gaming under one rooftop in Silang.
Actions	Primary: EXPLORE THE SPACE. Secondary: VIEW THE MENU. Keep GET DIRECTIONS visible in navigation or the first follow-up section.
Brand devices	Vertical logo at a page edge, thin chrome rule, and a small technical location/hours label. Use subtle mode labels, not gamer-style interface clutter.
Desktop layout	Strong left-aligned type with the venue visual on the right or overlapping center; minimum height 88-100vh.
Mobile layout	Headline remains dominant; coffee/work/play cues stack clearly without reducing readability. Minimum height approximately 85svh.

Hero content hierarchy

11. Logo / navigation
12. Small “COFFEE • COWORK • PLAY” eyebrow
13. Hero headline
14. One-sentence value proposition
15. Primary and secondary CTA
16. Optional current hours microcopy

DO NOT USE

Auto-rotating sliders, multiple competing hero products, long paragraphs, looping background video on mobile, floating ingredients across every section, fake coding screens, RGB gamer clichés, or unverified equipment claims.

06B / MENU EXPERIENCE

Informative but clean: showcase breadth, keep the hierarchy strong, and make every price editable.

Homepage featured menu

COMPONENT	SPECIFICATION
Section title	PICK YOUR CRAVING
Category filters	Coffee, Matcha, Non-Coffee, Breakfast, Croffles, Pasta, Pizza
Featured items	3–6 signature or bestselling items only
Product card	Image, name, short description, hot/iced price where applicable, one small badge
Photography	Large editorial image; no tiny thumbnail next to every line item
CTA	EXPLORE THE FULL MENU

Full menu behavior

- Use category navigation that remains easy on mobile; a horizontal scroll or accessible select is acceptable.
- Show hot and iced prices clearly as separate fields. Do not hide them inside body copy.
- Use one consistent badge system: SIGNATURE, BESTSELLER, HOUSE FAVORITE, NEW, or SOLD OUT.
- Allow category-level feature images; avoid a photo beside every menu item if it damages readability.
- Provide an availability toggle so sold-out items can be hidden or marked without deleting content.
- Do not hard-code current prices in the template. Prices and add-ons must come from the CMS.

Current menu category structure from supplied sheets

DRINKS	FOOD
Espresso-based / Commercial Coffee	All-Day Breakfast
Signature Coffee	Korean Croffles
Matcha Series	Pasta
Season Specials	Pizza
Chocolate / Milk-based	Seasonal Food (when available)
Soda Sparkle / Tea-based	Add-ons and upgrades

PRICE ACCURACY

The supplied menu sheets are visual references, not a guaranteed live database. Final menu names, descriptions, sizes, prices, and availability must be confirmed and entered into structured WordPress fields before launch.

06C / COWORKING, GAMING, ABOUT & FOUNDER

The website must explain the productive and recreational facilities as clearly as it explains the coffee and brand story.

Coworking section

ITEM	DIRECTION
Heading	WORK MODE
Purpose	Explain who the workspace is for, what is included, and why it supports focused sessions.
Required facts	Verified seating types, capacity, Wi-Fi, outlets, rates, session duration, operating hours, noise expectations, house rules, and reservation/walk-in process.
Visual	Real guests working or studying, laptops, shared tables, power access, warm lighting, and clear separation from gaming activity.
CTA	VIEW COWORKING DETAILS or MESSAGE TO RESERVE only when the reservation process is confirmed.

Gaming lounge section

ITEM	DIRECTION
Heading	GAME MODE
Purpose	Explain the gaming experience, available platform or station types, social atmosphere, pricing, and rules.
Required facts	Verified platform types, station count, rates, session duration, game-library policy, capacity, age rules, operating hours, equipment policy, and reservation/walk-in process.
Visual	Real players, screens/controllers, group energy, station details, and a clean setup. Avoid staged esports claims and aggressive RGB effects.
CTA	VIEW GAMING DETAILS or MESSAGE TO BOOK only when the booking process is confirmed.

About Us section

ITEM	DIRECTION
Heading	MORE THAN A COFFEE SHOP
Purpose	Explain the coffee shop, coworking space, gaming lounge, rooftop setting, late-night focus, broad menu, and warm industrial atmosphere.

ITEM	DIRECTION
Length	60–120 words on homepage; longer story may open in an accordion or separate page.
Visual	Rooftop/interior image showing coffee, focused work, gaming, warm lighting, customers, or founder in the space.
Suggested copy	Bean & Ben is a rooftop coffee shop, coworking space, and gaming lounge built for quick breaks, focused sessions, creative progress, and shared play.

Approved longer about copy starter

Bean & Ben was made for people who need more than one kind of space. Set above the street in Silang, it brings together bold coffee, satisfying food, focus-friendly coworking, and social gaming in one warm industrial rooftop destination. Guests can stop for a quick break, stay to finish meaningful work, meet collaborators, or switch into game mode with friends. The experience should feel useful without becoming corporate, playful without becoming noisy, and premium without unnecessary formality.

Meet the Founder section

REQUIRED CONTENT	DEVELOPER TREATMENT
Founder name and preferred title	Editable text field; do not publish placeholders.
Portrait or environmental photo	Use a high-resolution image with natural lighting; provide meaningful alt text.
Short origin story	Approximately 80–150 words; focus on why the café exists and what the founder wants guests to feel.
Optional quote	One short line in display type; no generic inspirational quote.
Optional links	Founder or café social profile only if approved.

MISSING SOURCE CONTENT

The supplied files do not provide the founder’s name, portrait, or approved story. These must be collected from the client. The developer must not invent biography or achievements.

06D / REVIEWS, GALLERY, LOCATION & FOOTER

Use real proof, show coffee, work, and play in action, then remove every barrier to visiting.

Reviews or image gallery

OPTION	RECOMMENDED USE
Curated reviews	Use 3–6 approved customer quotes with name/initial and source where permitted. Keep text concise and legible.
Atmosphere gallery	Use 8-12 selected rooftop, interior, coffee, coworking, gaming, people, food, and night images. Avoid automatic social-feed clutter.
Hybrid section	Recommended: 2-3 reviews combined with 6-8 strong images covering coffee, focus, and play.
Carousel rule	If used, provide visible controls, keyboard operation, pause behavior, and non-JavaScript fallback.

Location and contact section

ELEMENT	SPECIFICATION
Heading	SUNDAN ANG LIWANAG
Address	Rooftop of 888 Martinez Building, Brgy. Anahaw I, Silang, Cavite — verify before launch.
Hours	Daily 6:00 PM–2:00 AM; last call 1:30 AM — verify before launch.
Map	Embedded map or static map preview; lazy-load third-party embed where possible.
Directions CTA	GET DIRECTIONS; open the verified map listing in a new tab/app.
Contact	Phone and email once supplied; use the approved Facebook profile as the current direct-message/social channel.
Wayfinding copy	Wala kaming malaking signage. Sundan mo lang ang liwanag hanggang rooftop.
Facebook	https://www.facebook.com/profile.php?id=61573491156329

Footer requirements

- Wordmark or monogram.
- Menu, Coworking, Gaming Lounge, About, Founder, Reviews/Gallery, and Location links.
- Verified address, hours, last call, contact details, Facebook link, and any other approved social links.
- Copyright year and legal links.
- Final CTA to view the menu or get directions.

REVIEW INTEGRITY

Use only genuine, approved reviews. Do not write fake customer testimonials or import quotes without permission and source confirmation.

07 / INTERFACE DESIGN SYSTEM

A small, repeatable system keeps the site premium, fast, and easy to maintain.

Grid and spacing

VIEWPORT	GRID	SIDE MARGINS	SECTION SPACING
Desktop ≥ 1280px	12 columns; max content width 1440px	48–80px	120–180px
Tablet 768–1279px	8 columns	32–48px	88–120px
Mobile < 768px	4 columns	20–24px	64–88px

Spacing tokens

```
:root {
  --space-1: 0.25rem;
  --space-2: 0.5rem;
  --space-3: 0.75rem;
  --space-4: 1rem;
  --space-6: 1.5rem;
  --space-8: 2rem;
  --space-12: 3rem;
  --space-16: 4rem;
  --space-24: 6rem;
  --space-32: 8rem;
  --container: 90rem;
}
```

Component rules

COMPONENT	APPROVED STYLE
Primary button	Warm ivory background, black text, 2–6px radius, clear dark/oak hover, 44px minimum touch height.
Secondary button	Transparent background, chrome border, warm-white text, visible hover/focus treatment.
Product card	Carbon surface, thin border, strong image, minimal copy, no heavy drop shadow.
Content card	Warm ivory or carbon surface; use only when grouping is necessary—do not card every paragraph.
Icon	Simple line icon, white/chrome, consistent stroke. Avoid cute coffee illustrations as a permanent system.
Divider	1px chrome, steel, or warm-white rule.
Form field	High-contrast label, large hit area, clear error state, no placeholder-only labels.
Badge	Small technical label; one style only. Never use decorative floral icons or emoji as permanent UI.

State system

STATE	VISUAL REQUIREMENT
Hover	Subtle color/translate change; never the only cue for a link.

STATE	VISUAL REQUIREMENT
Focus	Visible 2px outline with adequate contrast; do not remove browser focus without replacement.
Active	Warm light or oak micro-accent plus text/shape change.
Disabled	Steel gray with reduced emphasis while remaining readable.
Error	Clear text message and visual indicator; do not rely on red alone.
Loading	Skeleton or restrained spinner; preserve layout to avoid shifting.

08 / RESPONSIVE & MOTION

Mobile is not a smaller desktop layout. Recompose the hierarchy for touch, speed, and clarity.

Recommended breakpoints

TOKEN	RANGE	USE
xs	320–479px	Small phones; test longest menu names and CTA widths
sm	480–767px	Large phones
md	768–1023px	Tablets and small landscape devices
lg	1024–1279px	Laptops
xl	1280–1599px	Desktop
2xl	1600px+	Large desktop; preserve max-width and negative space

Mobile-specific rules

- Maintain at least 20px side padding and 44×44px interactive targets.
- Use a full-screen navigation drawer with large links and a clear close control.
- Place “View Menu” and “Get Directions” within easy thumb reach.
- Allow category tabs to scroll horizontally or convert to an accessible select.
- Stack image/text layouts intentionally; do not simply shrink a desktop overlap until it becomes unreadable.
- Avoid autoplay video and heavy parallax on mobile.

Animation guidelines

TYPE	TIMING	USE
Interface hover/focus	150–250ms	Buttons, links, icons, navigation background
Section entrance	500–800ms	Fade, small slide, image reveal, text mask reveal
Product image emphasis	300–500ms	Subtle scale 1.00→1.02 or translate; no bouncing
Menu drawer	250–400ms	Opacity plus controlled panel movement

Motion restrictions

- Respect `prefers-reduced-motion`; disable non-essential movement.
- No canvas animation is required. Standard HTML, CSS, and basic JavaScript are sufficient.
- Do not use cursor trails, excessive parallax, constant floating objects, or animation that delays access to information.
- Animations must not shift layout or block interaction while loading.

09 / CONTENT & CMS MODEL

Anything that changes regularly - including menu items, coworking details, gaming details, rates, hours, and availability - should be editable in WordPress without touching code.

Recommended editable content

CONTENT TYPE	RECOMMENDED IMPLEMENTATION	KEY FIELDS
Menu items	Custom post type or structured repeater	Name, slug, description, category, hot price, iced price, image, badge, availability, sort order
Menu categories	Taxonomy or ordered options	Name, short intro, feature image, order
Featured products	Relationship/selection field	Selected items, display order, optional campaign text
Coworking details	Global options or structured repeater	Overview, seating, capacity, amenities, rates, session duration, hours, rules, reservation/walk-in process, availability
Gaming lounge details	Global options or structured repeater	Overview, platform/station types, station count, rates, duration, game-library note, hours, rules, booking/walk-in process, availability
Founder	Page fields or dedicated content block	Name, title, portrait, story, quote, link
Reviews	Reusable review entries	Quote, customer name/initial, source, rating if used, approval status
Gallery	Curated media gallery	Image, alt text, caption, experience category, order
Business details	Global site options	Address, map URL/embed, hours, last call, phone, email, Facebook, other socials
Announcements	Optional short notice system	Message, start/end date, link, active status

Suggested menu data model

```
Menu Item
- title
- slug
- short_description
- menu_category
- price_hot
- price_iced
- base_price / price_note
- featured_image
- badge: signature | bestseller | new | none
- is_available
- is_featured
- dietary_or_allergen_note (optional)
- sort_order

Coworking Details
- overview
- seating_types
- capacity
- amenities
- rates / price_note
- session_duration
- operating_hours
- reservation_or_walk_in_process
- house_rules
- is_available

Gaming Lounge Details
- overview
- platform_or_station_type
- station_count
- rates / price_note
- session_duration
- game_library_note
- operating_hours
- reservation_or_walk_in_process
- house_rules / age_rules
- is_available
```

CMS rules

- Never store price and availability only inside an image.
- Never require the client to edit theme files for hours, address, social links, menu prices, coworking amenities/rates, gaming stations/rates, or homepage featured content.
- Use validation for prices and URLs; sanitize input and escape output.
- Retain image alt-text fields and require meaningful alt text for informative images.
- Allow preview before publishing and maintain an easy rollback/revision workflow.

SCOPE DECISION

Online ordering, payment, automated reservations, delivery integration, loyalty accounts, live desk/station availability, game-session timers, or inventory are not supported by the supplied brief. Treat them as separate scope items requiring confirmed business rules and operations.

10 / WORDPRESS & CODE STANDARDS

Keep the implementation simple, secure, responsive, and maintainable. Do not overengineer.

Development approach

- Use semantic HTML5, modern CSS, plain JavaScript, PHP, and WordPress APIs.
- Avoid unnecessary frameworks, page-builder lock-in, large animation libraries, and build tools unless approved.
- Use Flexbox and Grid for layout. Use absolute positioning only for deliberate hero/art-direction overlaps.
- Keep code readable with four-space indentation, descriptive names, and comments that explain purpose—not obvious syntax.
- Remove console logs, abandoned variables, test alerts, and unused CSS before delivery.

Recommended theme structure

```
bean-ben-theme/
  assets/
    css/
      style.css
    js/
      script.js
    images/
  template-parts/
    sections/
      hero.php
      experience-pillars.php
      featured-menu.php
      coworking.php
      gaming-lounge.php
      about.php
      founder.php
      reviews-gallery.php
      location.php
  functions.php
  header.php
  footer.php
  front-page.php
  page-menu.php
  page-coworking.php
  page-gaming-lounge.php
  style.css
```

WordPress rules

AREA	REQUIREMENT
Core and theme	Never edit WordPress core. Use a custom theme or child theme and follow the template hierarchy.
Assets	Load CSS/JS using `wp_enqueue_style()` and `wp_enqueue_script()`; do not hard-code tags into templates.
Functions	Prefix custom PHP functions, classes, AJAX actions, options, and constants.
Security	Sanitize input, validate before saving, escape output, use nonces, and check capabilities.
Database	Use WordPress APIs and prepared queries. Avoid direct SQL unless necessary.
Secrets	Do not store API keys, passwords, or private credentials in theme files.
Functionality	Use plugins for site functionality and the theme for presentation.

Frontend conventions

```
/* BEM-style component names */
.hero-banner {}
.hero-banner__content {}
.hero-banner__title {}
.hero-banner__actions {}

/* JavaScript hooks */
.js-menu-toggle {}
.js-category-filter {}

// Use addEventListener() and event.key.
// Validate an element exists before modifying it.
// Prefer textContent for plain text.
// Use requestAnimationFrame() for smooth animation.
```

11 / ACCESSIBILITY, PERFORMANCE & SEO

Premium design fails if it is slow, difficult to use, unclear about the three experiences, or invisible in local search.

Accessibility requirements

☐	All interactive elements are keyboard reachable and have visible focus states.
☐	Heading order is logical; there is one clear H1 on each page.
☐	Text and controls meet appropriate contrast against black, ivory, and image backgrounds.
☐	Icon-only buttons have accessible names; form fields use real labels.
☐	Images use meaningful alt text when informative and empty alt text when decorative.
☐	Carousels, dialogs, and mobile navigation manage focus correctly and close with Escape.
☐	Reduced-motion preferences are respected.
☐	Error messages are specific and do not rely on color alone.

Performance requirements

☐	Serve responsive AVIF/WebP images with declared width and height.
☐	Compress hero imagery and preload only the true LCP asset.
☐	Lazy-load below-the-fold images, map embeds, and gallery media.
☐	Avoid loading large libraries for one minor effect.

☐	Minimize repeated DOM updates and unnecessary WordPress queries.
☐	Use caching and optimized hosting appropriate for WordPress.
☐	No console errors, missing assets, or layout shifts at launch.

Local SEO and social sharing

ITEM	RECOMMENDATION
Page title	Bean & Ben | Coffee Shop, Coworking & Gaming Lounge in Silang
Meta description	Proposed: Coffee, coworking, and social gaming under one rooftop in Silang. Explore the menu, workspace, gaming lounge, hours, and location.
Structured data	Use verified LocalBusiness/CafeOrCoffeeShop structured data for the venue and describe coworking and gaming services clearly in visible page content. Add only technically valid additional schema after verification.
Open Graph	Use a strong branded image that shows the venue and hints at coffee, focus, and play at 1200×630.
URLs	Use clean slugs such as `/menu/`, `/coworking/`, and `/gaming-lounge/`, or clear anchored sections if dedicated pages are not launched.
Analytics	Install only after client supplies approved account IDs and consent requirements.

VERIFICATION RULE

Schema, map links, phone, hours, Facebook/social profiles, coworking amenities and rates, gaming equipment and rates, and any reservation claims must use verified live business information. Do not publish guessed data simply to complete a field.

12 / DELIVERY & ACCEPTANCE

The project is complete only when the design is accurate, content is editable, and launch quality has been tested.

Client inputs required before production completion

REQUIRED CLIENT INPUTS

☐	Approved transparent logo files (SVG preferred; transparent PNG backup).
☐	Final founder name, title, portrait, approved story, and quote.
☐	Verified menu data: item names, descriptions, hot/iced prices, add-ons, badges, availability.
☐	Verified coworking details: seating, capacity, amenities, rates, session duration, hours, house rules, and reservation/walk-in process.

☐	Verified gaming details: platform/station types, count, rates, session duration, game-library policy, hours, house rules, age/equipment rules, and reservation/walk-in process.
☐	High-resolution product, café, coworking, gaming, rooftop, team, and customer photography with usage permission.
☐	Verified address, map listing, operating hours, last call, phone, email, approved Facebook profile, and any other social links.
☐	Approved customer reviews and permission/source details.
☐	Hosting, domain, WordPress administrator access, and analytics/SEO account ownership.
☐	Privacy policy and any required legal/consent language.

Developer deliverables

☐	Responsive homepage, full menu, coworking, and gaming lounge experience matching this visual direction.
☐	Reusable design system and documented CSS variables/components.
☐	Editable WordPress fields for menu, coworking, gaming lounge, founder, reviews, gallery, business details, and featured items.
☐	Optimized images, accessible interactions, and tested mobile navigation.
☐	SEO metadata, verified local structured data, sitemap, Facebook/social sharing, and link setup.
☐	Source code, theme/plugin list, credentials handoff process, and backup/export.
☐	Short client guide for updating menu prices, coworking/gaming details and rates, availability, hours, images, social links, and featured items.

12A / QA & LAUNCH CHECKLIST

Use this exact list for staging approval and final acceptance.

☐	Hero uses the exact headline “FOR YOUR BREAKS & BREAKTHROUGHS.”
☐	The first screen clearly states coffee shop, coworking space, and gaming lounge.
☐	Visual palette, typography, spacing, and logo use follow Sections 04-08.
☐	Menu, coworking details, gaming details, and directions are reachable quickly from the hero/navigation.
☐	Founder and review content is real, approved, and not placeholder text.
☐	All menu prices, hot/iced variants, and availability are editable and correct.

☐	All published coworking and gaming amenities, rates, rules, hours, capacity, and booking/walk-in details are verified and editable.
☐	Address, hours, last call, map link, phone/email, Facebook, and other social links are verified.
☐	The approved Facebook link opens correctly and is used consistently in the location section and footer.
☐	No duplicated IDs, invalid links, missing alt text, or console errors.
☐	Keyboard navigation, focus states, mobile drawer, filters, and carousels work correctly.
☐	Pages work at 320px, 375px, 768px, 1024px, 1440px, and large desktop widths.
☐	Images are compressed and responsive; below-the-fold media is lazy-loaded.
☐	No horizontal scrolling, clipped text, overlapping content, or layout shift.
☐	Current Chrome, Firefox, Safari, and Edge are tested.
☐	Forms validate, show clear errors, and send to the correct destination.
☐	Backups, security updates, caching, analytics, and search-console ownership are confirmed.
☐	Client receives training and a final site backup/export.

Acceptance standard

The site should be premium enough to feel special, useful enough for focused work, fun enough for shared play, and clear enough that a customer can understand the venue and plan a visit without thinking twice.

Final creative test

1. Does it feel bold?
2. Does it feel warm despite the black palette?
3. Does it look intentional rather than decorated?
4. Are coffee, focused work, and gaming represented with the right visual balance?
5. Is every important detail easy to understand?
6. Does it feel like Bean & Ben rather than a generic café, coworking space, or gaming lounge?
7. Does it make the rooftop coffee, coworking, and gaming experience desirable?
8. Does it look premium without pretending to be luxury?

13 / REFERENCE ASSETS

The following supplied images establish the current logo, visual identity, and menu structure. They are references, not guaranteed production master files.

Supplied Bean & Ben identity board and packaging/environment references.

PRODUCTION NOTE

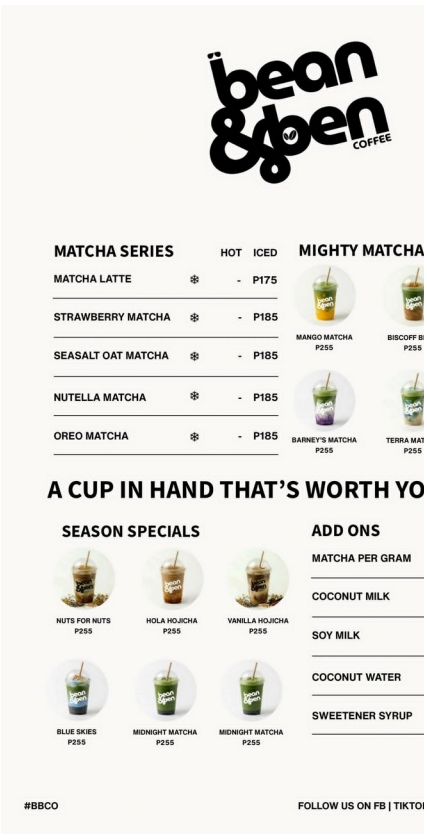

Use the visual system shown here, but request original logo and photography files. Do not crop production assets from this board.

13A / CURRENT MENU REFERENCES - DRINKS

Use these sheets to understand category structure and current visual language; confirm all live data separately.

Espresso, commercial coffee, and signature coffee sheet

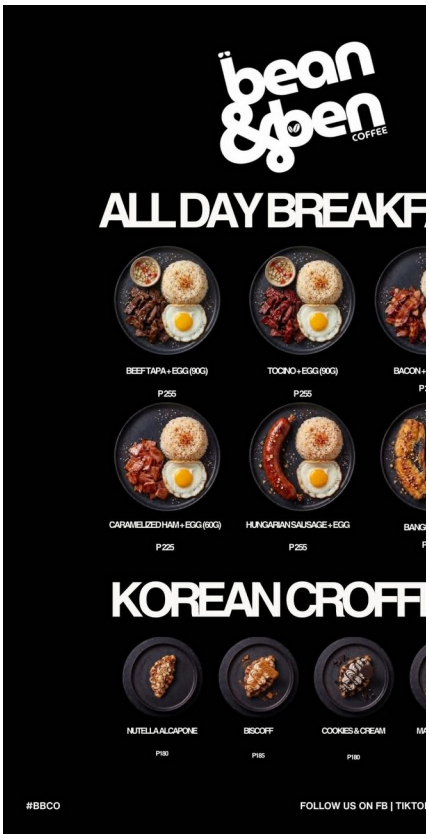

Matcha series, season specials, and add-ons sheet

13B / CURRENT MENU REFERENCES - NON-COFFEE & FOOD

The menu supports a flexible work-and-play destination, not only a coffee stop.

Chocolate, milk-based, soda sparkle, and tea-based sheet

All-day breakfast and Korean croffles sheet

13C / CURRENT MENU REFERENCES - PASTA & PIZZA

Food must receive strong visual importance alongside the coworking and gaming experience.

Pasta and pizza menu sheet supplied for reference.

Final visual standard: BLACK. WARM LIGHT. STRONG TYPE. COFFEE. FOCUS. PLAY.

14 / HANDOFF SUMMARY

The developer should be able to quote, design, build, and test the expanded coffee shop + coworking + gaming lounge website from this document without guessing the brand direction.

DECISION	APPROVED DIRECTION
Brand	Bold, warm rooftop coffee shop + coworking space + gaming lounge with playful local personality
Hero	FOR YOUR BREAKS & BREAKTHROUGHS
Core idea	COFFEE. COWORK. PLAY.
Style	Modern industrial luxury / warm industrial minimalism
Palette	Black, warm ivory, chrome/steel, cement, light oak, warm-light accents
Typography	Bebas Neue Cyrillic display direction + Manrope body
Primary actions	Explore the Space, View Menu, and Get Directions
Build	Responsive WordPress, semantic HTML, clean CSS, plain JavaScript
Content	Structured CMS fields for menu, coworking, gaming, and business details; no hard-coded live data
Launch standard	Accessible, fast, locally discoverable, easy to maintain

FOR YOUR BREAKS & BREAKTHROUGHS.

Document owner: Bean & Ben. Version 1.1. Updated 22 July 2026. Update this guide whenever the approved brand, menu structure, coworking offer, gaming offer, business details, or website scope changes.
